How Can the Needle Move on HPV Infection & Cancer Mitigation? A Dialogue on HPV Prevention Methods in Adult Populations

Tuesday, July 29, 2025

7:15 AM - 8:15 AM

Room 210 E

Overview

Key Objectives of the Symposium are:

1. Discuss current evidence surrounding HPV prevention and immunization strategies in reducing the incidence of HPV-related infections and cancers among adults, including the public health implications beyond "catch-up programs"
2. Review the current guidelines and best practices for HPV screening in adults, including the integration of HPV testing in routine cancer screening protocols and HPV "Faster" Strategy
3. Evaluate the social, economic, and healthcare-related challenges surrounding adult uptake of HPV prevention strategies, including high risk populations such as those with STI/HIV

Agenda

- 7:15 - 7:20 Introduction of the presenters
 by Mona Saraiya
- 7:20 - 7:35 Presentation of Objective #1 and part of
 Objective #2
 Dr. Eduardo Franco
- 7:35 - 7:50 Presentation of Objective #2 and 3
 Dr. Marc Steben
- 7:50 - 8:05 Moderated discussion period
- 8:05 - 8:15 Questions from the audience

Speakers

Dr. Eduardo Franco

McGill, Montreal, Canada

Dr. Marc Steben

HPV Global Action, Montreal, Canada

Moderator

Mona Saraiya

Merck, North Wales, USA
